Lexia Instructions for Parents

1. Go to www.lexiacore5.com for K-5 students
2. Go to www.lexiapowerup.com for 6-8 students
   a. Download the app on your ipad or kindle
3. Add teacher email (if it asks)
4. Username is first initial, last name, PW is read
5. If your child is an existing user, continue work in the program. Recommended times are 60 minutes per week. Your teacher might recommend daily usage of 15-20 minutes.
6. After new users sign in, they will automatically begin the program's auto-placement. It consists of 15-20 minutes of questions. Once completed, the program will log the student back out. Then, sign back in to begin the assigned units that match up to the identified program level.
7. As children work in their assigned skills, they will complete a circular bar, until it is filled. Once all 5 (for Core5) are completed, it will unlock the next 5 skills to be worked on. Powerup works similarly.
